Our Ref.No. 2018BEX018 /Tuesday, 22 May 2018

The University of Bologna

Via Zamboni, 33 Bologna (Bo), Italy

E-mail: rettore@unibo.it

To the kind attention of: Professor Francesco Ubertini – Rector of the University of Bologna

Dear Sir,

I address you, following the decision of the Academic Council of Peoples Academy of Science, Education, Culture – Sofia, Bulgaria, as Chairman of the Academy and Head of the council. We are a Bulgarian non-profit NGO since 2016 and we aim at working for the development of prosperous society in Bulgaria and in Europe. Applied to this letter I send a leaflet presenting our Academy.

Here in Bulgaria, we are well aware of the history of your University, but we know very little about your present activities and plans for development. Moreover, we are very interested in developing future mutually beneficial relations between our Academy and the University of Bologna in the spheres of scientific research and educational activities. We would like to propose the building of a close relationship between our institutions in order to achieve effective scientific services for present and future societies, and our Peoples Academy Science Education Culture possesses the ambition and the human potential for that. We are particularly interested in Your Business School.

For some time now, we have restarted our international magazine "E & M Smart Education" in the Internet to give the floor to innovations and improvements in the educational systems of our countries. We mean to stay on the pulse and to keep open the discussions on the methods, means and instruments to improve the response of the educational systems to the more and more rapidly changing and higher demands of the present society. The Editorial board of our magazine includes nominated scientists and professionals from Bulgaria, Russia, France, USA, and Finland.

It is my pleasure to invite you to become a member of our Editorial board as representative of the University of Bologna and thus you could invite all of your colleagues to send articles for our magazine. We all here highly esteem the potential of Italian scientists to contribute to our magazine and to the development of educational science.

I remain in expectancy of your reply.

Please accept my best regards and wishes for success.

Acad. Asen Bogdanov – Chairman
